

Bauer's Cordyline *Cordyline 'Baueri'*

Height: 10 feet

Spread: 5 feet

Sunlight:

Hardiness Zone: 7b

Other Names: False Dracaena

Ornamental Features

Bauer's Cordyline has attractive burgundy foliage. The sword-like leaves are highly ornamental and remain burgundy throughout the winter. Neither the flowers nor the fruit are ornamentally significant.

Landscape Attributes

Bauer's Cordyline is an open multi-stemmed evergreen shrub with an upright spreading habit of growth. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This shrub will require occasional maintenance and upkeep, and should never be pruned except to remove any dieback, as it tends not to take pruning well. It has no significant negative characteristics.

Bauer's Cordyline is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use
- Container Planting
- Hanging Baskets

Planting & Growing

Bauer's Cordyline will grow to be about 10 feet tall at maturity, with a spread of 5 feet. It tends to be a little leggy, with a typical clearance of 3 feet from the ground, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years.

This shrub does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH, and is able to handle environmental salt. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.

Bauer's Cordyline makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor containers and hanging baskets. Its large size and upright habit of growth lend it for use as a solitary accent, or in a composition surrounded by smaller plants around the base and those that spill over the edges. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
