

## Johnin Japanese Maple\*

*Acer 'Johnin'*

Height: 25 feet

Spread: 20 feet

Sunlight: ○ ●

Hardiness Zone: 5a

Other Names: Red Full Moon Maple

### Description:

An elegant ornamental tree with leaves that emerge a bright red and turn burgundy and green veins during summer, finishing off with a display of brilliant fall color; great accent tree for smaller home landscapes

### Ornamental Features

Johnin Japanese Maple is primarily valued in the landscape for its ornamental upright and spreading habit of growth. It has attractive burgundy foliage with light green veins which emerges red in spring. The deeply cut lobed palmate leaves are highly ornamental and turn outstanding shades of orange and in the fall.

### Landscape Attributes

Johnin Japanese Maple is a deciduous tree with an upright spreading habit of growth. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a relatively low maintenance tree, and should only be pruned in summer after the leaves have fully developed, as it may 'bleed' sap if pruned in late winter or early spring. It has no significant negative characteristics.

Johnin Japanese Maple is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening

### Planting & Growing

Johnin Japanese Maple will grow to be about 25 feet tall at maturity, with a spread of 20 feet. It has a low canopy with a typical clearance of 2 feet from the ground, and should not be planted underneath power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 60 years or more.
